Sunnerg Group

Sunnerg Group is a General Contractor and Service Provider specialized in the design and implementation of turnkey projects in the B2B renewable energy market. The founding partners of Sunnerg Group are key figures in the industry, with consolidated international experience: in 2017, they created the company in Milan and developed a growing business, differentiating it and opening it to new markets.

Today Sunnerg Group invests in sustainable development: it is present in several European countries – with increasing geographical and workforce expansion.

Sunnerg Group has chosen to position itself in the international market because it knows the scope for growth of its services outside the country's borders. The turnkey services that Sunnerg offers are invaluable to the renewable energy sector and can thus contribute to a more sustainable future for the entire planet.

The Sunnerg Group looks to the future with optimism and acts with the highest standards of conduct and social responsibility.

Our values

Innovation

We surprise and create value in the businesses line in which we operate.

Honesty

We base every relationship on ethical principles of integrity.

Excellence

We set ambitious goals and draw on the expertise of all staff to achieve them.

Trust

We strive tirelessly to exceed the expectations of our stakeholders.

Social Responsibility

We act in accordance with the logic of sustainable development from an economic, social and environmental point of view.

Talent

We promote the development of the knowledge and skills of our professionals.

Keeping an international eye on the market allows the Sunnerg Group to work with partners all over the world. It is the relationships that are established outside of our own borders that allow us to increase our experience and technical knowledge, which are fundamental in order to satisfy the different needs of our customers.

Vision, Mission, Competitive Advantage

Mission Towards the future

Sunnerg Group works with a clear goal: to **change the future of energy**. It believes in energy produced from **renewable sources** that is managed efficiently and contributes to creating the new model of eco-sustainable development that will ensure the future for next generations

Sunnerg Group positions itself in the domestic and international renewable energy market by offering customers a scalable and efficient service.

Innovation, passion, trust, talent, excellence and responsibility are the driving values of the group.

Vision Competitive advantage

Sunnerg Group maximizes the value of clients' investments by offering a **business model** to **develop, structure** and **implement** any renewable energy project tailored to the client's **needs, timing** and **budget**.

The group has a consistently growing track record and consistently satisfied clients. The group has a consistently growing track record and consistently satisfied clients.

ENERGY & FACILITY MANAGEMENT

Who we are

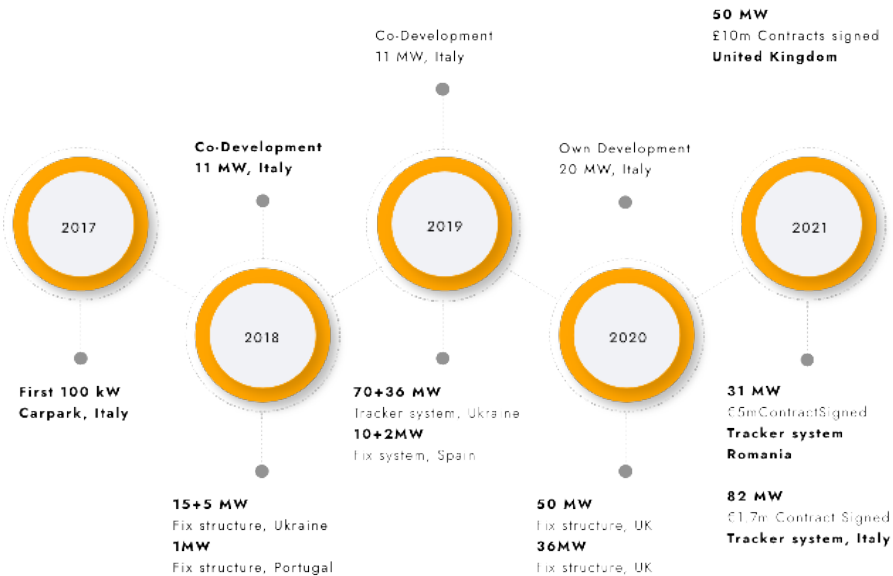

We help our customers in sustainable development through the supply of turnkey plants for the production of **renewable energy**.

Sunnerg Group was founded in Milan in 2017. Since then, thanks to the leadership of the founding partners, the company has continued to grow and develop, differentiating its business and opening up to new markets. Today it has a stable presence in the UK, Italy, Romania and other Countries, covering Europe and non-European Countries.

The mission of Sunnergis to help the customer in the sustainable development through the supply of turnkey plants for the production of renewable energy, which includes the feasibility study, design, installation and support for financing according to the highest standards of quality and technology.

Sunnerg Group takes advantage of the great development opportunities in the market in which it operates through partnerships with national and international groups and leading investment funds, ensuring the supply of turnkey plants through the EPC Contractor scheme.

Sunnerg Group believes in renewable energy as a strategic asset for the future of the planet and the next generations. For this reason, Sunnerg Group is positioned on the national and international market of renewable energy by offering a scalable and efficient service, helping to create a new model of sustainable development.

Development

Customer coaching and support at every stage of the project to develop a sustainable and profitable investment

Sunnerg assists the customer in the development of the project by carrying out the economic and financial feasibility study of the plant and providing support during the planning and evaluation phases of the PPAs (Power Purchase Agreements).

Sunnerg enhances the value of each project by studying the most efficient and effective solution for each client through an authorization development process that includes

- site analysis
- technical-administrative feasibility study
- final design (electrical, mechanical, civil)
- request for construction authorization from all bodies involved

ITALIA: 190 MW in planning & 130 MW BOS/BOP

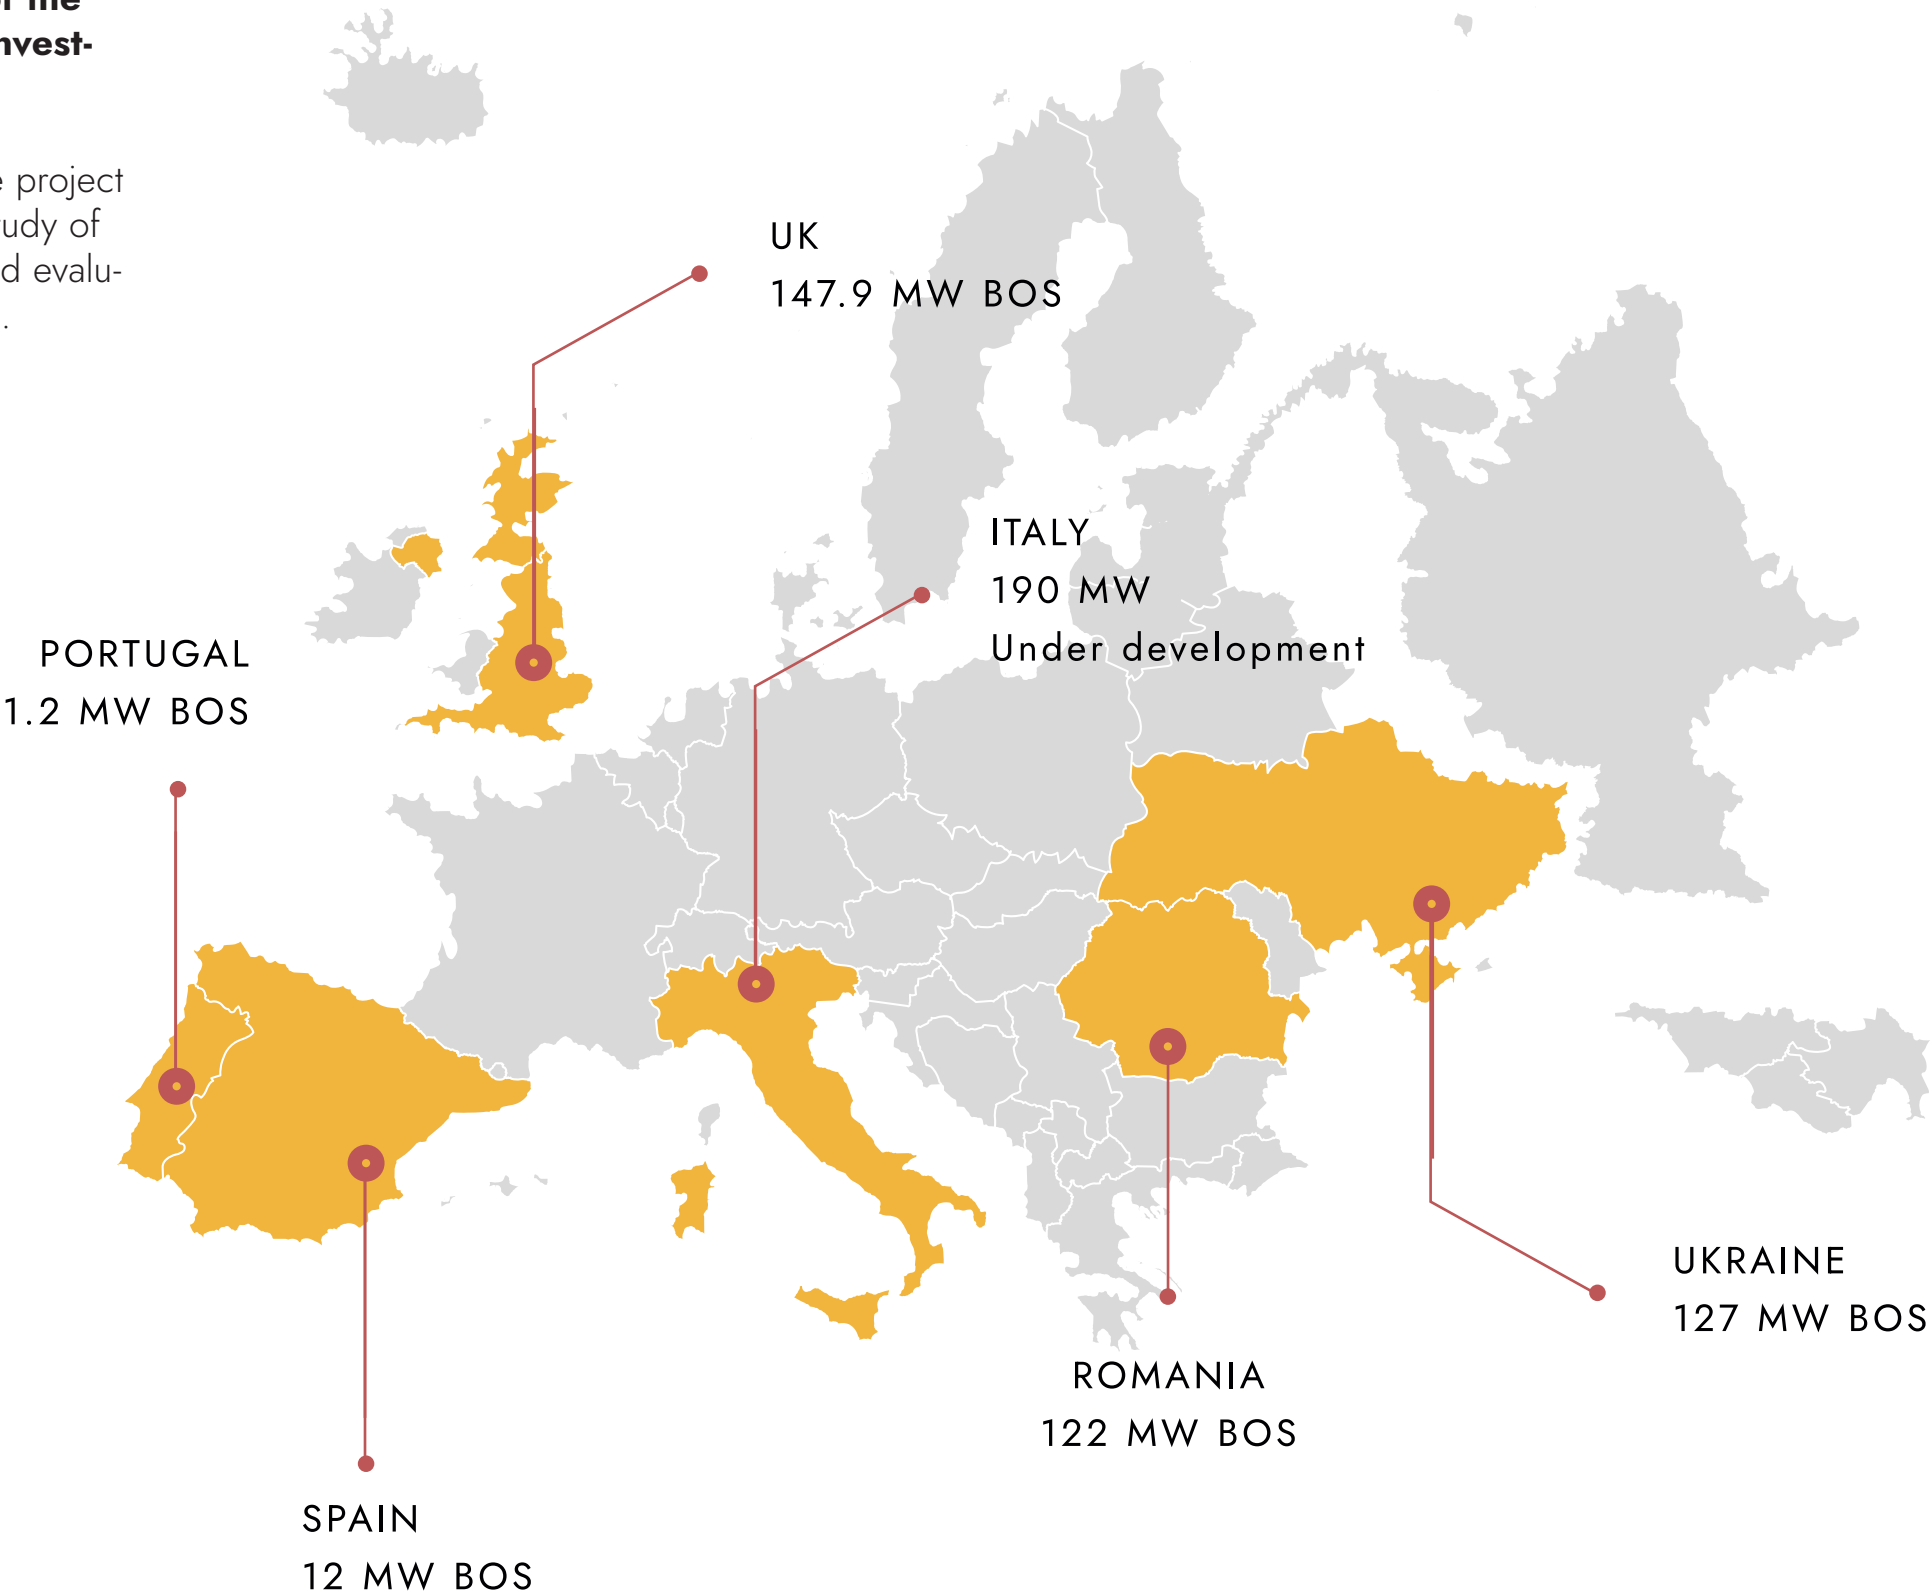

PORTOGALLO: 1.2 MW BOS

ROMANIA: 122 MW EPC/BOS

UK: 147.9 MW BOS

SPAGNA: 12 MW BOS

UCRAINA: 127 MW BOS

Construction

Sunnerg develops ad hoc solutions, designs, builds and tests plants while maintaining a high standard of quality and coordinating the available resources to achieve the project objectives on time and on budget.
